Community Support Programs

2017-2018 Intensive Outpatient Treatment Core Program Description

The Performance Improvement Council (PIC) under the direction of Ginger Little prepared the 2017-2018 Intensive Outpatient Treatment Core Program Description. This document was reviewed and approved by the PIC on July 27th 2017.

PHILOSOPHY

Community Support Services (CSS) provides periodic substance use services in several locations in Mecklenburg County. The philosophy of the Intensive Outpatient Program is to approach all clients using a strengths-based framework and to provide person centered and culturally competent services. This philosophy is reflected in the agency's performance improvement plan and other management tools and guidelines. Services are provided to clients and families based on concept that individuals and families possess unique strengths, knowledge and abilities that enable them to set goals for growth and positive change. Our staff members provide services in a fashion that empowers clients and families to gain greater self-sufficiency.

DESCRIPTION

The Substance Abuse Intensive Outpatient Program is designed to assist clients with beginning their recovery and learning skills for recovery maintenance. The program offers structured individual and group addiction activities and services. The following types of services are included in the Program:

- Individual counseling and support;
- Group counseling and support;
- Family counseling, training and support;
- Biochemical assays to identify recent drug use (e.g., urine drug screens);
- Strategies for relapse prevention to include community and social support systems in treatment;
- Life skills;
- Crisis contingency planning;
- Disease management; and
- Treatment support activities that have been adapted or specifically designed for persons with physical disabilities, or persons with co-occurring disorders of mental illness and substance use or dependence, or mental retardation or developmental disabilities and substance use or dependence.

SERVICE MODALITIES

Services are provided directly to clients using an Integrated Dual Disorder Treatment (IDDT) model, peer support, group counseling, recreational therapy, psycho-educational lectures and 12-step Facilitation Model. It is a planned program of professionally directed evaluation, care and treatment aimed at restoration of functioning for persons with substance use or substance use/psychiatric disorders. Services offered are directly provided to clients.

GOALS

The program strives to improve the lives of the individuals and families being served by increasing abstinence and improved health and psychosocial functioning, reduction in public health and safety concerns, and reduction in relapse risk. The program seeks to improve client safety through education about diagnoses, medications, and high risk behaviors. The program will facilitate an assessment of the person to determine the next appropriate level of care and refer appropriately.

POPULATION SERVED:

The program serves the following populations who are in jail or in shelters:

- Adult Substance Use Clients; or
- Adult Substance Use Clients with co-occurring Mental Illness.

SPECIAL POPULATIONS

Shelter Programs

- Individuals who reside at the Shelters.
- Priority access to the program is given to individuals who are pregnant or IV drug users.

PROGRAM STRUCTURE

The program operates from 8:30 AM 12:00 PM, a minimum of 3 days per week at the following locations:

- Men's Shelter of Charlotte
- The Salvation Army Center of Hope (Women's Homeless Shelter)

Enrollment in the program is limited to the population of the site.

RESOURCES AVAILABLE / SUPERVISION

CSS utilizes a staffing pattern to maintain the staff to client ratio for each population. If necessary, programs may utilize appropriately cross-trained staff to assist from other programs. Qualified personnel from a staffing agency may also be used.

Certified Clinical Supervisors and administrative supervisors are assigned to each staff member, trainee, intern or student. Volunteers are not used to provide clinical services. Clinical supervisors employ a variety of methods to ensure quality service is being provided to clients and their families and that staff continually improve their skills.

2017-2018 Intensive Outpatient Treatment Core Program Description

Formal training is available to staff. Substance Use Intensive Outpatient staff and supervisors agree on an individual training plan for the staff member at least annually as part of supervision.

Other available resources include physical office space for meeting with individuals and families; use of county vehicles; computers and phones.

REFERRAL SOURCES

Primary local referral sources for the Shelter Programs include:

- Individuals are referred to the Shelters by: Carolinas Medical Center – Randolph, Anuvia, McLeod, Hope Haven, Mecklenburg County Department of Social Services, the Managed Care Organization, and the Criminal Justice System. Self-referrals are accepted. The Shelters then refer individuals to the Shelter Programs.

When individuals require a higher level of services, staff will make an appropriate referral to meet the client's needs. This process is noted in our Operational Procedures.

PAYOR SOURCES

Revenue for the shelter programs is generated from services billed to the state. The shelter program receives a significant portion of its operating budget directly from the County. A small percentage of funding is received through billing of Medicaid for treatment and for diagnostic assessments.

FEES

Financial information is collected from clients by the Shelter Program staff at the time of admission and charges are applied based on a sliding fee scale.
